## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 404. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 3-5, 12-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3-5 and 12-14 include the functional recitation that is indefinite because it is not supported by recitation in the claim of sufficient structure to accomplish the function.

### ***Claim Rejections - 35 USC § 102***

Art Unit: 2835

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 1, 3-7, 9, 11-16 are rejected under 35 U.S.C. 102(a) as being anticipated by Chung et al.

Chung discloses the system for cooling a CPU comprising: a heat sink assembly 100 having a fan 120, air channels and a heat sink lid 110 coupled to the heat sink assembly, the heat sink lid has an edge perpendicular to a direction of air flow within the air channel and it is configured to leave a portion of the air channel uncovered, the airflow noise is inherently reduced as function of the device configuration.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 2 rejected under 35 U.S.C. 103(a) as being unpatentable over Chung et al. in view of Bartley et al.

Chung discloses the claimed invention except the thermal adhesive. Bartley discloses the heat sink assembly coupled to the CPU by thermal adhesive 55. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to

Art Unit: 2835

use thermal adhesive as disclosed by Bartley for the device disclosed by Chung for reliable heat transfer between a heat-generating device and a heat sink.

8. Claims 8, 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chung et al.

Chung discloses the claimed invention except the graphics processing unit and the application-specific integrated circuit. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to use the cooling system as disclosed by Chung for the graphics processing unit and the application-specific integrated circuit since it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).
